

ABOUT TEMPER-CRETE

Westcoat's Temper-Crete System is a one-step flooring system and a cost-effective option when thermal and shock resistance are required. This urethane cement system is monolithic, flowable, and installed with limited downtime. Offering attributes such as excellent impact, chemical, heat, and steam resistant qualities, Temper-Crete is designed for areas with heavy foot and moderate wheel traffic. Ideal for commercial kitchens, restaurants, warehouses, breweries, wineries, chemical processing plants, food processing plants, and pharmaceutical facilities.

ULTRA-TOUGH. PROTECTIVE.

- Thermal Shock Resistant
- High Compressive Strength
- USDA/FDA/ADA Compliant
- High Build
- Chemical Resistant
- Self-Priming
- Fast Turnaround
- Decorative Options

FOR PROFESSIONAL USE ONLY.

Temper-Crete RT System features 100% solids, self-priming, integrally colored, moisture tolerant, matte finish, self-leveling, high-yield, urethane cement coating. It is designed for areas with heavy foot and moderate wheel traffic and can be installed from 3/16 to 1/4 inch thick. Temper-Crete RT is thermal shock resistant, does not require a topcoat, and is ideal for food and beverage industries, manufacturing, storage, and warehouses.

Temper-Crete RTB System adds a slip-resistant silica sand broadcast and pigmented finish. A variety of Westcoat's pigmented topcoats can be utilized depending on the demand of the space, including a UV-resistant urethane cement topcoat. Temper-Crete RTB is ideal for use in kitchens, warehouses, food services, wineries, distilleries, and regular and automotive manufacturing.

Temper-Crete RTC System builds upon the basic RT system and features an optional integral colored urethane cement base, a decorative color chip broadcast using TC-60 Color Chips, and is sealed with EC-95G Gloss Polyurethane Topcoat. Temper-Crete RTC is ideal for use in laboratories, pharmaceutical spaces, retail, classrooms, hallways, and lobbies.

Temper-Crete RTQ System adds an optional integral colored urethane cement base, a decorative quartz sand broadcast using TC-65 Quartz Sand, and is sealed with EC-36 100% Solids Epoxy and EC-95G. Temper-Crete RTQ offers a decorative and slip-resistant finish that is ideal for use in kitchens, restrooms, veterinary offices, and kennels.
